Editorial

As we embark on another 365-day journey, RHK is truly grateful to share another year with our readers, fans, models, photographers, and everyone else who continues to support us.

2020 was filled with plenty of memories ... some good, some bad ... but memories nonetheless! The main takeaway from 2020, at least for me personally, was to count my blessings. Be grateful. Savor the moment. Breathe. Look for the positives in every situation. And hopefully I was able to convey that message to everyone I had an opportunity to work with. Even though we faced small obstacles and challenges, we had (and have) so much to be thankful for ... and a better day is always on the horizon!

With all of the challenges we faced in 2020, we were still able to continue our operations without interruption ... and had another great year! We released exclusive content every month, with over 25 all-new issues. We worked with new featured models, while some of our previously featured models returned with even hotter content!

All in all ... last year was a huge success!

In 2021, we hope to get back on our promo-tours, which give us the opportunity to meet and discover the world's hottest models. And, as always, our goal is to deliver the best magazines and products we possibly can ... our readers and fans deserve nothing but the best!

Again, thank you for everything ...

I greatly appreciate YOU!

I started modeling in 2018, with Rick Trottier. I found information about doing a shoot from the office of an aerial arts studio I was working at the time, and while working with Rick he gave me information about how to get started modeling. From there, I've been able to network and have participated with concepts ranging from traditional boudoir, baroque-inspired art, portraits, and my personal favorite, horror-inspired art. I have a pinup concept planned for the spring and intend on specializing in more gothic and dark art concepts. In addition to modeling, I work on a farm and am creating my own herbal beauty products, which brings me a lot of joy as I'm more of a flowerchild than I may let on.

My sexiest feature?

I’m going to be really basic and say my eyes … but the eyes are where the life is in a picture and they really are the windows to the soul.

At an average resting heart rate of 55 beats per minute, my heart has pumped vital nutrients and oxygen throughout my body over 780 million times. My name is Tani. I have been a model since 2012, which means that I have spent almost one-third of my life and over 200 million heart beats perfecting my craft of becoming living, breathing art.

Along my path, I invested thousands of hours into researching the human body. Our bodies are at constant work for us ... they keep us respirating, our blood pumping, they capture information and read it in the brain, they release endorphins, repair cellular damage, and clone its own cells. All for the sake of continuation of life. And I find it absolutely magical.

With this reverence for the human body in my heart, I have begun seeking a career as a physician. Though I am no longer as active as a model, I will always be proud of where I came from. I will always be grateful for the woman that these experiences sculpted me, like porcelain clay, to become. The human body is a scientific marvel and an artistic masterpiece. We are art. All of us.

I have a deeply hidden and inarticulate desire for something beyond the daily life. I want to make a mark on the world, even if that means I make one person smile a day.

My eyes are my sexiest feature!
